**Endangered Alphabets, Cultural** Erosion, and the Future of the Written Word: Thurs., Feb. 9 at 7:00 pm. What does the age of digital convergence, Facebook, and globalization mean for the future of the written word? Writercarver-painter Tim Brookes offers remarkable and thought-provoking perspective on this question by looking at a range of forms of writing from all over the world that are in danger of extinction. He displays a carving of a piece of text in each script, leading a discussion on how technology will help—and always has helped-define the nature of communication, and shows how the story of a culture can be seen in its writing, even if that writing is (as in these examples) beautiful, utterly unfamiliar, and disappearing.

## THETFORD ENERGY COMMITTEE

# WEATHERIZATION: A COMMUNITY EFFORT

Feb. 7, 6pm, Thetford Center Community Building

Your home can be cooler in summer, and warmer in winter, with lower energy bills. You can solve moisture problems, eliminate drafts, and improve the performance of your home through weatherization.

If all that sounds good, where to start? Your neighbors are ready to help you get started, and to support you each step of the way. Maybe you h a v e a l r e a d y d o n e s o m e weatherization and have stories and advice to share, or want to know what you can do next?

Attend our Kick-Off Event, Tues., Feb. 7th, 6-8 pm, at the Thetford Center Community Association building, across from Town Hall. Door opens at 6:00, presentation starts 6:30. Meet the volunteer team and our partner contractors, and learn about costs, benefits, incentives, and how you can participate and benefit. Refreshments will be served.

Weatherize is run by a team of volunteers from the Hartland, Hartford, Norwich, and Thetford energy committees, with support from Vital Communities and Efficiency Vermont. Our four Weatherize partner contractors, Building Energy, Solsaa Building and Energy Solutions, Van de Ven Construction, and Vermont Foam Insulation, are offering FREE professional consults, home visits, and energy improvement quotes for residents in our four towns. Anyone who signs a contract with one of our partner contractors by May 31 will be eligible to win up to \$2,500 toward the cost of their home energy project, in addition to Efficiency Vermont rebates.

Most weatherization projects focus on air sealing and insulation. According to Efficiency Vermont, the average cost of weatherization improvements in our region is \$7,800 (before rebates, which average around \$1,500), resulting in increased comfort and 26% average energy savings annually. Learn more at vitalcommunities.org/weatherize or contact Mike Kiess at 299-5864 or MichaelKiessVT@gmail.com.

## NONFICTION BOOK DISCUSSION GROUP

The next meeting of Thetford's informal nonfiction book discussion group will take place at Latham Library on Thetford Hill on Tues., Feb. 28th at 7 pm.

We will be discussing *The Undoing Project* by Michael Lewis: How a Nobel Prize-winning theory of the mind altered our perception of reality. Forty years ago, Israeli

psychologists Daniel Kahneman and Amos Tversky wrote a series of breathtakingly original studies undoing our assumptions about the decision-making process. Their papers showed the ways in which the human mind erred, systematically, when forced to make judgments in uncertain situations. Their work created the field of behavioral economics, revolutionized Big Data studies. advanced evidence-based medicine, led to a new approach to government regulation, and made much of Michael Lewis's own work possible. Kahneman and Tversky are more responsible than anybody for the powerful trend to mistrust human intuition and defer to algorithms.

You can find the book at your library; via interlibrary loan; as an audio or e-book via the Green Mountain (<u>gmlc.overdrive.com</u>) or New Hampshire (<u>nh.overdrive.com</u>) library consortiums; from your bookseller; or at bookfinder.com.

All are welcome and we look forward to seeing you.
